

BURN LESS COAL—HAVE MORE HEAT

GLOBE RANGE BURNERS will do both, because of their scientific construction. The lower part of the "down" flue extends from the bottom base-plate to the top of the ash pit. Then, three flues in the back are three-fourths exposed. This distinctive GLOBE construction gives you twice the direct heat radiation of any ordinary base burner, at less cost! Don't take our say-so. Come in and see for yourself. Rigorously inspect a GLOBE RANGE BURNER. That's all we ask.

Other products of the Globe Stove & Range Co., Kokomo, Ind., are: Globe Steel and Cast Range Base Burners, Soft Coal Heaters and Warm Air Furnaces.
